

NEENAH PAPER

Adobe Swatch Exchange (.ase) files are available for the majority of Neenah Paper grade lines. Here's how to import them into to your workflow.

Importing into InDesign

1

Find the ASE file for the grade of paper you want to use. 

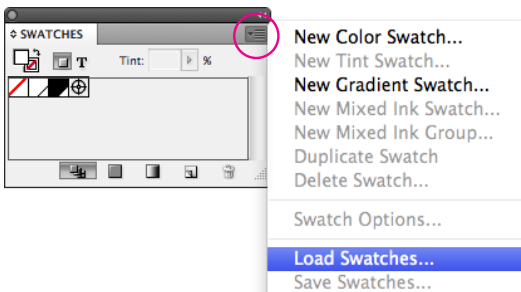

Download the file to a location where you can find it later.

2

Open your swatches palette.

3

Click the flyout menu and choose "Load Swatches."

4

Navigate to the ASE file you downloaded from Neenahpaper.com.

5

Your swatches will be appended to your current swatches in InDesign. Note that the swatches import as spot colors.

NEENAH PAPER

Adobe Swatch Exchange (.ase) files are available for the majority of Neenah Paper grade lines. Here's how to import them into your workflow.

Ai Importing into Illustrator

1  [Find the ASE file for the grade of paper you want to use.](http://www.neenahpaper.com/Resources/AdobeSwatches)

Download the file to a location where you can find it later.

2  Open your swatches palette.

3  Click the flyout menu and choose "Open Swatch Library" then "Other Library."

4  Navigate to the ASE file you downloaded from Neenahpaper.com.

5  Your swatches will open up in a new swatch palette.

As you use the swatch from this new palette they will automatically be added to the document swatches.
