

NEENAH DIGISCAPE® STICK-R WALLCOVERING CARE

LATEX PRINTED CARE GUIDE

DigiScape® Wallcovering is designed to give you years of enjoyment on your walls. Routine cleaning and spot cleaning are sometimes necessary to keep your walls in perfect condition.

To clean your wallcovering, a solution of mild dish soap and water are best to protect the printed finish. A microfiber cloth should be used to wipe down the wall.

Add a teaspoon of a mild dish soap such as Dawn to a ½ gallon of water in a bucket, mix gently to incorporate the dish soap without creating excessive bubbles.

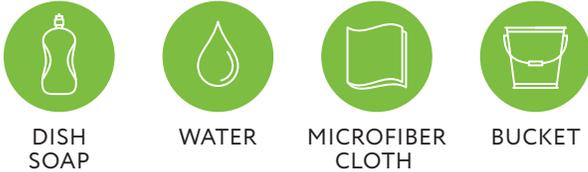

- Dip microfiber cloth into solution and wring out the cloth leaving it damp.
- Wipe the wallcovering gently in circular motions.

For aggressive stains, such as ink, food, etc., a very gentle solution of isopropyl alcohol and water can be used. 10% isopropyl alcohol and 90% water mixed in a spray bottle.

- Spray directly to the wallcovering and wipe with a microfiber cloth immediately.

Note: This process can potentially remove some ink from the wall and should only be used for severe stains as color of the design can become muted.
